1.0 INTRODUCTION ........................................................................................................... 12
1.1 Film Dielectric Materials for The Capacitor Industry: .............................................. 12
1.1 (A) Polypropylene: ........................................................................................................ 12
  Polypropylene Dielectric Film (PP): ............................................................................... 12
  Polypropylene Use In Capacitors: .................................................................................. 12
  Advantages and Disadvantages of Polypropylene: ....................................................... 12
1.1 (B) Polyethylene Terephthalate: .................................................................................. 13
  Polyethylene Terephthalate Film (PET): ........................................................................ 13
  Polyethylene Terephthalate Use In Capacitors: ............................................................. 13
  Advantages and Disadvantages of PET Film .................................................................. 13
1.1 (C) Polyphenylene Sulfide: .......................................................................................... 13
  Polyphenylene Sulfide Film (PPS): ............................................................................... 13
  Polyphenylene Sulfide Film Use In Capacitors: ............................................................ 14
  Advantages and Disadvantages of PPS Film ................................................................ 14
1.1 (D) Polyethylene Naphthalate: ..................................................................................... 14
  Polyethylene Naphthalate Film (PEN): .......................................................................... 14
  Polyethylene Naphthalate Use In Capacitors: ............................................................... 14
  Advantages and Disadvantages of PEN Film ............................................................... 15
1.1 (E) Polycarbonate: ....................................................................................................... 15
  Polycarbonate Film (PC): .............................................................................................. 15
  Polycarbonate Film in a Capacitor: ................................................................................ 15
  Advantages and Disadvantages of PC Film ................................................................. 15
1.1 (F) Polystyrene: ............................................................................................................ 15
  Polystyrene Film (PS): ................................................................................................. 15
  Polystyrene Film in a Capacitor: .................................................................................... 15
  Advantages and Disadvantages of Polystyrene Film: .................................................. 16
1.1 (G) Polytetrafluoroethylene: ....................................................................................... 16
  Polytetrafluoroethylene (PTFE)-Teflon® Film: ............................................................. 16
  PTFE Film in a Capacitor: ............................................................................................... 16
  Advantages and Disadvantages of PTFE Film: ............................................................ 16
1.1 (H) Polyimide: ............................................................................................................. 16
  Polyimide Film (PI)-Kapton®: ....................................................................................... 16
  Polyimide Film in a Capacitor: ....................................................................................... 17
  Advantages and Disadvantages of Polyimide Film: ..................................................... 17
1.1 (I) Siloxane: ................................................................................................................ 17
  Siloxane Film: .............................................................................................................. 17
  Siloxane Film in a Capacitor: ......................................................................................... 17
  Advantages and Disadvantages: .................................................................................... 17
1.1 (J) Polyvinylidene Difluoride: .................................................................................... 17
  Polyvinylidene Difluoride Film (PVDF): ...................................................................... 17
  PVDF Film in a Capacitor: ............................................................................................. 17
  Advantages and Disadvantages: ................................................................................... 17
1.1 (K) Polysulfone: .......................................................................................................... 18
  Polysulfone Film in a Capacitor: ................................................................................... 18
  Advantages and Disadvantages: ................................................................................... 18
1.1 (M) Other Plastics for Capacitors: .............................................................................. 18
5.0 PLASTIC DIELECTRIC FILMS: GLOBAL MARKET ANALYSIS: YEAR END 2012 ..........39
  5.1 PLASTIC DIELECTRIC FILMS CONSUMED IN THE CAPACITOR INDUSTRY: 2012 ..................39
    5.1.1 Polypropylene (PP) Film Consumption in The Capacitor Industry: ..39
    5.1.2 Polyethylene Terapthalate (PET) Consumption in The Capacitor Industry: ..39
    5.1.3 Polyphenylene Sulfide (PPS) Consumption in The Capacitor Industry: ..39
    5.1.4 Polyethylene Napthalate (PEN) Film Consumption In The Capacitor Industry: ..40
    5.1.5 Defense, High Heat, High Energy Density and Other Exotic Film Markets: ..40
    5.1.6 Plastic Dielectric Film: Average Film Thicknesses By Dielectric: ..40
    5.1.7 Plastic Dielectric Film: Price Per Pound Comparison: ..40

6.0 PLASTIC DIELECTRIC FILMS: SUPPLY CHAIN ANALYSIS: 2012 ..................43
  6.1 FILM EXTRUSION, METALLIZATION, CONSUMPTION AND MARKET DRIVERS: 2012 ..........43
    6.1.1 Capacitor Film Extrusion: Competitive Environment: ..43
    6.1.2 Capacitor Film Metallization: Competitive Environment: ..43
    6.1.3 Capacitor Manufacturers: Competitive Environment: ..43
    6.1.4 End-Use Market Segments Driving Demand for Capacitor Film: ..43
      6.1.4 (A) Market Drivers For Polypropylene Capacitors: ..44
      6.1.4 (B) Market Drivers for Polyethylene Terapthalate: ..44
      6.1.4 (C) Market Drivers for PEN and PPS: ..44
      6.1.4 (D) Market Drivers for Exotic Dielectric Films: ..45

7.0 PLASTIC DIELECTRIC FILM: MARKETS BY WORLD REGION: 2012 ..................46
  7.1 Polypropylene Dielectric Film Markets By World Region: 2012 ..................46
    7.1.1 European Capacitor Grade PP Film Consumption and Key Customers: ..46
    7.1.2 Asia-Pacific Capacitor Grade PP Film Consumption and Key Customers: ..46
    7.1.3 Americas Capacitor Grade PP Film Consumption and Key Customers: ..46
    7.2 Polyethylene Terapthalate Dielectric Film Markets By World Region: 2012 ..................47
      7.2.1 Asian-Pacific Capacitor Grade PET Film Consumption and Key Customers: ..47
      7.2.2 European Capacitor Grade PET Film Consumption and Key Customers: ..47
      7.2.3 Americas Capacitor Grade PET Film Consumption and Key Customers: ..48
    7.3 Polyphenylene Sulfide (PPS) Dielectric Film Markets By World Region: 2012 ..................49
      7.3.1 Asia-Pacific Capacitor Grade PPS Film Consumption and Key Customers: ..49
      7.3.2 European Capacitor Grade PPS Film Consumption and Key Customers: ..49
    7.4 Polyethylene Napthalate (PEN) Dielectric Film Markets By World Region: 2012 ..................50
      7.4.1 European Capacitor Grade PEN Film Consumption and Key Customers: ..50
      7.4.2 Asia-Pacific Capacitor Grade PEN Film Consumption and Key Customers: ..50
    7.5 Exotic (PTFE, Polyimide) Dielectric Film Markets By World Region: 2012 ..................51
      7.5.1 Americas Exotic Capacitor Grade Film Consumption and Key Customers: ..51
      7.5.2 European Exotic Capacitor Grade Film Consumption and Key Customers: ..51
      7.5.3 Asian Exotic Capacitor Grade Film Consumption and Key Customers: ..51
    7.6 Summary: Plastic Dielectric Film: Global Markets By World Region: 2012 ..................52

8.0 PLASTIC DIELECTRIC FILMS COMPETITIVE ENVIRONMENT & SHARES: 2012 ..........54
  8.1 COMPETITIVE ENVIRONMENT FOR CAPACITOR FILMS BY TYPE: 2012 ..................54
  8.2 Polypropylene Supply Chain To The Capacitor Industry: 2012 ..................54
  8.3 Competition in The Low Ash Polypropylene Resin Market: ..................54
  8.4 Competition In Polypropylene Extrusion Into Capacitor Film: ..................54
  8.5 Competition In Metallization of Polypropylene Capacitor Film: ..................55
  8.6 Vertical Integration in Polypropylene Supply To The Capacitor Industry: 2012 ..................56
  8.7 Market Shares In Polypropylene Supply To The Global Capacitor Industry: 2012 ..................57
  8.8 Regional Competition In PP Film Supply To The Capacitor Industry: 2012 ..................57
  8.8.1 Europe: ..................57
  8.8.2 Asia & Oceania: ..................57
  8.8.3 The Americas: ..................58
8.9 Polyethylene Terephthalate (PET) Supply Chain To The Capacitor Industry: 2012: ...58
8.10 Competition in The Low Ash Polyethylene Terephthalate (PET) Resin Market: ...58
8.11 Competition In Polyethylene Terephthalate (PET) Extrusion Into Capacitor Film: ...58
8.12 Competition In Metallization of Polyethylene Terephthalate (PET) Capacitor Film: ...58
8.13 Vertical Integration In PET Supply To The Capacitor Industry: 2012:............................59
8.14 Market Shares In PET Supply To The Global Capacitor Industry: 2012:..........................60
8.15 Regional Competition In PET Film Supply To The Capacitor Industry: 2012:..................61
8.16 Market Shares In Exotic Film Supply To The Global Capacitor Industry: 2012:............62
8.17 Summary: Top Vendors of Capacitor Grade Film To The Capacitor Industry: 2012:....62

9.0 PLASTIC DIELECTRIC FILMS: CUSTOMERS AND END-MARKETS: 2012..........................64
9.1 Trends and Directions In Plastic Film Capacitors- A Summary of Changing Markets: ....64
9.2 PLASTIC FILM CAPACITORS: GLOBAL MARKET BREAKDOWN: 2012............................65
9.2.1 Plastic Film Capacitor Market Overview: 2012:............................................................65
9.2.2 AC Versus DC Plastic Film Capacitor Market Overview: 2012:....................................65
9.2.3 Global Consumption Volumes for Plastic Film Capacitors by Type: 2012:...................65
9.3 Market Breakdown for Plastic Film Capacitor Consumption By Type & Category: 2012:..66
9.4 POLYPROPYLENE FILM CAPACITOR MARKETS: 2012..................................................67
9.4.1 Polypropylene Film Capacitor Types:..........................................................67
9.4.2 Polypropylene Film Capacitor Configurations:.........................................................67
9.4.3 Polypropylene Film Capacitor Markets:..........................................................67
9.4.3 (A) Power Transmission and Distribution PFC Capacitor Markets: 2012:..................68
9.4.3 (B) Motor Run Capacitor Markets: 2012:.........................................................69
9.4.3 (C ) Industrial Power Factor Correction Capacitors:.............................................72
9.4.3 (D) Lighting Ballast PFC Capacitors (Magnetic & HID):........................................73
9.4.3 (E) Microwave Oven Capacitors:..............................................................75
9.4.3 (F) Power Film Capacitors (AC Filtering, Snubber, Commutation, Pulsed Power):...76
9.5 Summary: Supply Chain for Polypropylene To The Global Capacitor Industry: 2012:..79
9.6 Polypropylene Film Capacitor Manufacturers By Type & Vendor: 2012:.....................79
9.7 MAJOR CUSTOMERS FOR AC FILM CAPACITORS: 2012:.............................................81
9.8 PET, PEN and PPS FILM CAPACITOR MARKETS: 2012:............................................82
9.8.1 Metallized DC Film Capacitor Construction:.........................................................82
9.8.2 Metallized DC Film Capacitor Configurations:.......................................................82
9.8.3 The DC Film Chip Capacitor (PPS, PEN and PET Dielectric Films):..........................83
9.8.4 General Purpose PET Film Capacitors (P5 Inductive)................................................84
9.8.5 Interference Suppression Capacitors (X/Y)..............................................................84
9.8.6 Pulse Film Capacitors:.........................................................................................86
9.8.7 SMD Film Chips (PET, PEN, PPS).............................................................87
9.8.8 Summary: DC Film Capacitor Consumption By Type: 2012:....................................87
9.9.1 General Purpose PET Film Capacitor Market Outlook:...........................................88
9.9.2 Interference Suppression Film Capacitor Market Outlook:.......................................88
9.9.3 Pulse Film Capacitors Market Outlook:.....................................................................89
9.9.4 SMD Film Chip Capacitors: Market Outlook............................................................92
9.9.5 Global Sales and Market Shares In The DC Film Capacitor Market 2012:................97

10.2.1 Capacitor Types Consumed in Renewable Energy Systems:.................................99
10.2.2 Plastic Film Capacitors Consumed In Renewable Energy Systems By Type: 2012:....99
10.3 Capacitor Applications In Wind Energy Systems: 2013:............................................104
10.3.1 Capacitor Applications in Motor Drives In Wind Energy Systems: 2013:...............104
10.3.2 Capacitor Applications For Power Conversion In Wind Energy Systems: 2013:....105
10.3.1 Capacitor Applications For Power Quality In Wind Energy Systems: 2013........105
10.4 Capacitor Applications in Solar Energy Systems: 2013..............................107
10.5 Capacitor Applications in Geothermal Renewable Energy Systems: 2013........109
3.1.5 (A) Capacitor Applications In Geothermal Heat Exchangers: 2013..............109
3.1.5 (A1) Motor Run Capacitors..........................................................109
10.6 Capacitor Applications in Emerging Renewable Energy System Markets: FY 2013...109
10.7 Global Value of Demand For Capacitors Consumed in Renewable Energy Systems by
Capacitor Type 2013........................................................................110
10.8 Plastic Film Capacitor Vendors To The Global Renewable Energy Markets: 2013
Estimated Market Shares:.....................................................................111
10.10 CAGR Forecasts For Renewable Energy Systems by Type: 2013-2030........113
10.10.1 Solar Energy Systems: Growth Forecasts To 2030.................................113
10.10.2 Wind Turbine Systems: Growth Forecasts To 2030................................113
10.11 Global Revenue Forecasts For Capacitors Consumed in Renewable Energy Systems
by End-Use Market Segment: 2013-2018..................................................114
7.3.1 Global Forecasts For Capacitors Consumed in Wind Systems: 2013-2018........114
7.3.2 Global Forecasts For Capacitors Consumed in Solar Systems: 2013-2018 ....114
10.12 Global Revenue Forecasts For Capacitors Consumed in Renewable Energy Systems
by Dielectric: 2013-2018.......................................................................114
7.4.1 Forecasts For Plastic Film Capacitor Consumption in Renewable Energy Systems:
2013-2018.....................................................................................115
10.13 Capacitor Films for DC Link Circuits in HEV:............................................115
10.14 Plastic Film: High Temperature Plastic Film Capacitors >175 Degree C........116
10.15 High Temperature Capacitor Markets By End-Use Market Segment: 2012........117
10.15.1 Defense & Aerospace Electronics:.......................................................117
10.15.2 Defense Related Platforms Consuming High Temperature Capacitors: 2012 ...118
10.16 Oil, Gas & Geothermal Electronics:.......................................................118
10.17 Specialty Industrial Electronics:.............................................................118
10.18 Peripheral Market Opportunities..........................................................119
10.19 High Temperature Plastic Film Capacitors: Global Markets: FY 2012........119
10.20 Operating Voltage of High Temperature Plastic Film Capacitors >175 Degrees C By
Component Configuration: FY 2012.....................................................120
10.21 Capacitance Value of High Temperature Plastic Film >175 Degrees C By Component
Configuration: FY 2012.....................................................................120
10.22 Self-Healing Aspect of Dielectric Plastic Film...........................................121
10.23 Research and Development in High Temperature Plastic Film Capacitors: FY 2012...121
10.24 Defense and Other Applications For High Temperature Film Capacitors: FY 2012...121
10.25 Market Shares in High Temperature Plastic Film Capacitors: 2012..............122
10.26 Plastic Film Material Used In High Temperature Film Capacitors > 175 Degrees ...123
10.26.1 Polyimide Film:..............................................................................124
10.26.2 PTFE Film:...................................................................................124
10.26.3 Historical Attempts and High Temperature Plastic Film Development: 1995-2012
(PB, PBT and BB Films)........................................................................124
10.26.4 FPE Film Development:...................................................................125
10.27 Roadmapping The Future:.....................................................................125
10.27.1 What are the Growth Trends?............................................................125
10.29 SMD FILM CHIP CAPACITORS: MARKET OPPORTUNITIES..............126
10.29.1 Growth Forecasts For DC Film Chip Capacitors....................................126
10.29.2 Threats To The Market.................................................................126

11.1 OVERALL VALUE, VOLUME AND PRICING FORECASTS BY CAPACITOR FILM TO 2018 ....127
11.2 Polypropylene Capacitor Film: Value, Volume and Pricing Forecasts To 2018 ............... 127
11.2.1 Polypropylene Capacitor Film: Reasons Behind Forecasts To 2018 ......................... 127
11.3 PEN Capacitor Film: Value, Volume and Pricing Forecasts To 2018 .......................... 128
11.3.1 PEN Capacitor Film: Reasons Behind Forecasts To 2018 ..................................... 128
11.4 PPS Capacitor Film: Value, Volume and Pricing Forecasts To 2018 .......................... 128
11.4.1 PPS Capacitor Film: Reasons Behind Forecasts To 2018 ..................................... 128
11.5 PEN Capacitor Film: Value, Volume and Pricing Forecasts To 2018 .......................... 128
11.5.1 Polyethylene Naphthalate Capacitor Film: Reasons Behind Forecasts To 2018 .... 129
11.6 Exotic Capacitor Films: Value, Volume and Pricing Forecasts To 2018 ..................... 129
11.6.1 Exotic Capacitor Films: Reasons Behind Forecasts To 2018 .................................... 129

12.0 PLASTIC DIELECTRIC FILM PRODUCER PROFILES: ........................................ 130
12.1 Anhui Safe Electronics Co., Ltd. .................................................................................. 130
12.2 Birkelbach Kondensatortechnik GmbH .................................................................. 130
12.3 Bolloré Group ........................................................................................................ 130
12.4 Borealis Polymers N.V. ............................................................................................ 131
12.5 Fuwei Films (Shandong) Co., Ltd. ........................................................................... 132
12.6 Jaivic Electromech Engineering PVT LTD. ............................................................... 132
12.7 Kopafilm Elektrofolien GmbH ................................................................................ 133
12.8 MIRWEC Film, Inc. ................................................................................................... 134
12.9 Polypex (Thailand) PCL ........................................................................................... 134
12.10 Shanghai Xishu Electronic Material Company Ltd. ................................................ 134
12.11 Shin-etsu Film Company Limited: ........................................................................... 134
12.12 Sichuan EM Technology Company Limited ............................................................ 135
12.13 SKC Co., Ltd. ........................................................................................................ 135
12.14 SMEC Limited Korea .............................................................................................. 135
12.15 Steiner GmbH & Co KG .......................................................................................... 136
12.16 Teijin DuPont Films ............................................................................................... 139
12.17 Tervakoski Films Group .......................................................................................... 140
12.18 Tianjin Wanhua Co., Ltd. ....................................................................................... 142
12.19 Tibrewala Electronics Limited ................................................................................ 142
12.20 Toray Advanced Film Company Limited ............................................................... 142
12.21 Treofan Germany GmbH & Co KG .......................................................................... 144
12.22 Wenling Capacitor Factory ...................................................................................... 145
